

Zainab Ayyoob

Moradabad, Uttar Pradesh | +91-9368437997 | zainabayyooob59@gmail.com

Technical Skills

- Programming Languages: Java, Python, C, C++
- Web Technologies: HTML, CSS
- Database Technologies: SQL, MySQL, Oracle
- Tools & Platforms: VS Code, GitHub
- Core Concepts: Object-Oriented Programming (OOP), Database Management Systems, Problem Solving
- Professional Skills: Problem Solving, Communication Skills, Teamwork & Collaboration, Leadership, Time Management, Adaptability, Presentation Skills

Projects

Automated Data Ingestion & File Processing Pipeline

- Designed and developed a fault-tolerant backend pipeline to automate data ingestion and file processing workflows.
- Programmatically parsed structured (.csv) and unstructured (.txt) data and managed end-to-end file operations including renaming, archiving, and data purging.
- Implemented robust exception-handling mechanisms to ensure continuous execution and prevent runtime failures.
- Simulated real-world data engineering workflows by automating workspace setup, data processing, and file system management.
- GitHub Link: github.com/zainabayyooob/automated-data-ingestion-pipeline
- Tech: Python, CSV, OS, Shutil, File Handling, Exception Handling, Automation Scripting.

Diabetes Prediction Using ML Application

- Developed an interactive machine learning application to predict the likelihood of diabetes using the Pima Indians Diabetes Dataset.
- Performed data preprocessing, feature scaling, and train-test splitting to prepare data for model training and evaluation.
- Implemented a Logistic Regression model and evaluated performance using accuracy score, confusion matrix, and classification reports.
- Built an interactive prediction system that accepts patient health parameters and generates real-time diabetes predictions.
- Applied machine learning and data analytics techniques to solve a real-world healthcare problem.
- GitHub Link: github.com/zainabayyooob/Diabetes-Prediction-ML
- Tech: Python, Machine Learning, Scikit-Learn, Pandas, NumPy.

Car Price Prediction Using ML Application

- Developed a machine learning application to predict used car prices using vehicle attributes and historical data.
- Performed data preprocessing, feature engineering, and model training for accurate

price prediction.

- Built an interactive prediction system that accepts user inputs and generates real-time car price estimates.
- Applied machine learning techniques to solve a real-world automobile pricing problem.
- GitHub Link: <https://github.com/zainabayyooob/car-price-predictor-using-ML>
- Tech: Python, Scikit-Learn, Pandas, NumPy.

Achievements & Leadership

- Smart India Hackathon (SIH) Participant
- Participated in IEEE Code Quiz and Carbon Footprint Solution Challenge
- Participated in college-level coding and technical competitions
- Contributed to research preparation and technical presentations
- Served as Anchor/Host for workshops, seminars, and technical events
- Volunteered in college events and technical activities
- Presented Research Paper titled "Next Gen Language Learning: AI Innovations and Educational Impact" at the International Seminar on AI-driven Future (2025)

Certifications

- Java Training Certification (4 Credits, Score: 92.5%) – EduPyramids, SINE IIT Bombay
- Deloitte- Data Analytics Virtual Experience Program (Forage)
- JPMorgan Chase & Co. – Quantitative Research Virtual Experience Program (Forage)
- Tata Group – Cybersecurity Analyst Virtual Experience Program(Forage)
- Forage - Data Labeling Virtual Experience Program (Forage)
- Cyber Security 4.0 Certification
- Machine Learning & Digital Forensics Certification
- AI & ML: From Concept to Implementation

Education

- Teerthanker Mahaveer University Moradabad, Uttar Pradesh
Bachelor of Technology (B.Tech) – Computer Science & Engineering
CGPA: 7.5/10 | Current Semester: 5th | 2024-2028

Languages:- English, Hindi.
